

Research Associate II, Process Development

SUMMARY:

Icosavax, Inc. (NASDAQ: ICVX) is a publicly traded biopharmaceutical company leveraging its innovative VLP platform technology to develop vaccines against infectious diseases, with an initial focus on life-threatening respiratory diseases. Icosavax's VLP platform technology is designed to enable multivalent, particle-based display of complex viral antigens, which it believes will induce broad, robust, and durable protection against the specific viruses targeted. Icosavax's pipeline includes vaccine candidates targeting respiratory syncytial virus (RSV), human metapneumovirus (hMPV), and severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Based in Seattle, Icosavax was formed in 2017 to advance the breakthrough VLP technology from the Institute for Protein Design at the University of Washington with the goal to discover, develop, and commercialize vaccines against infectious diseases.

Icosavax seeks a Research Associate II with a background in general lab operations and downstream process development to advance our clinical manufacturing programs. The primary focus of the position will involve general lab support and downstream process development of recombinant proteins.

RESPONSIBILITIES:

- Conduct essential lab functions including buffer preparation, ordering, shipping and equipment operation/maintenance
- Execute protocols for the purification and analysis of recombinant proteins and protein complexes
- Assist in authoring SOPs, methods and technical reports
- Maintain complete and accurate laboratory notebooks
- Effectively communicate experimental design and results to supervisor and/or project teams

EDUCATION, EXPERIENCE, KNOWLEDGE AND SKILLS:

- BS degree in life sciences
- 2+ years industry experience
- Experience with chromatographic purification of recombinant proteins
- Experience with general day-to-day lab operations
- Practical knowledge of analytical characterization techniques
- Excellent organizational and verbal/written communication skills
- Demonstrated proficiency in data analysis and verbal and written technical communication

PHYSICAL DEMANDS:

- Manual dexterity required to operate lab and office equipment

OTHER:

- Location: Seattle, WA
- Must be eligible to work in the USA
- To reduce the presence and severity of COVID-19 cases in the workplace and in our communities, Icosavax requires all newly hired employees to be fully vaccinated against COVID-19 before commencing employment, subject to reasonable accommodation and other requirements of applicable federal, state and local law.
